

To coordinate your care in the best possible way, please share this report with your physician.

Dear Primary Care Provider,

Attached is a summary report of screening exams performed on your patient by Matrix Medical Network. These screenings were read and interpreted by our board-certified physicians. Additionally, the screening results are intended to complement your patient's health records and assist you in managing your patient's healthcare needs. This information is not intended to replace your professional advice.

The criteria for the screening exams have been established with evidenced based guidelines from organizations such as the American College of Cardiology, The American Heart Association, American College of Radiology, and the US Preventative Task Force. Please note that these are screening exams, not full diagnostic studies. The results provided in this report may show abnormalities discovered during the screening process that range from mild to severe. Please review these results with your patient and determine next steps, if any.

Matrix's affordable screening services can be beneficial to your other patients. To find out how to offer these services to your patients, call us or send an email. Should you have any questions, feel free to contact the Matrix medical staff at [info@matrixhealth.net](mailto:info@matrixhealth.net) or call us at 1-866-371-3703.

Best regards,

A handwritten signature in black ink, appearing to read 'D Castillo', with a horizontal line extending from the end of the signature.
